- Double-Pane Glass
- Argon Gas Filled Insulated Glass
- Sloped Sill  
(Envision Single + Double Hung)
- Integral Nailing Fin
- Limited Lifetime Warranty

### The Envision Series

Our Envision Series feature Innergy thermal reinforcements an innovative, energy-efficient reinforcement alternative to aluminum. With up to 700 times better thermal performance than aluminum in material-to-material comparisons, this feature is a big performance advantage. In addition, Innergy reinforcements help to prevent staining that can occur with metal reinforcements and improved condensation protection.

At Vector Windows, our dedication to recycling and reclaiming materials has evolved into a broader commitment to sustainability and the conscientious management of all our resources. These initiatives include all our major product components—glass, vinyl, and metal. In addition, our saws and glass cutters utilize optimization software to greatly reduce the amount of material waste generated. For further details on our sustainability efforts and initiatives, please visit us at [vectorwindows.com/sustainability](http://vectorwindows.com/sustainability). Together, let's make a positive impact on the environment and embrace a greener future.

### Patio Doors

Vector full view sliding patio doors incorporate enhanced performance and ease of installation in a door system that has all the flexibility needed for today's design trends.
